Abstract (en)

[origin: WO2021099396A1] The invention relates to a sifting wheel (2) for a sifting device (1) for sifting milled comminuted products, in particular particulate bulk material, comprising sifting wheel lamellae (5), which are arranged in the radially outer region of the sifting wheel (2), and canvas fabric elements (8), which are arranged in the radially inner region of the sifting wheel (2) at a radial distance to the sifting wheel lamellae (5). The invention additionally relates to a method for sifting milled comminuted products and to the use of canvas fabric elements (8) when sifting milled comminuted products.
