Abstract (en)

[origin: WO2020052841A1] The invention relates to a transport device (100), in particular a pram, comprising at least three wheels (116, 118, 120, 122) and a handle (110) for a user, wherein at least one wheel (118, 120) of the at least three wheels (116, 118, 120, 122) is designed as a drive wheel (124, 126) which can be electromotively driven by means of an associated electric drive unit (142) in order to allow an at least partial electromotive support of a manual pushing or pulling operation of the transport device (100) by the user. According to the invention, a state detection unit (170) is provided, which is designed to detect an in each case actual operating state of the transport device (100).
