Abstract (en)
[origin: WO2020052837A1] The invention relates to a combing machine (1) comprising more than eight combing heads, wherein each combing head is designed to be fed by means of at least one lap or by means of at least one sliver from cans, wherein the combed fibres are combined to form a separate sliver per combing head and are transported to a finish table (5), supplied to a draw frame (10), and drawn out to form a sliver and placed in a can. According to the invention, the draw frame (10) has a working width, on the nip line of the main draft, of more than 180 mm, preferably at least 200 mm.
