Abstract (en)

[origin: WO2020053468A1] The disclosure concerns a compartmentalized header tank (1) for liquid coolant, comprising a container (2) having an upper portion (2a) and a lower portion (2b) on an inside thereof. The upper portion (2a) is laterally divided into fluid impermeable partitions by at least one downwardly extending divider element (3), said partitions being open towards the lower portion (2b). The lower portion (2b) being defined by the inside of the container below the at least one divider element (3). The header tank comprises at least two tank gas outlets (4), positioned in respective partitions of the upper portion (2a), at least two tank coolant inlets (5) corresponding to respective tank gas outlets (4) and positioned below thereof in the respective partition, and a tank coolant outlet (6) positioned in a lower portion of the container. An associated header tank arrangement, power plant and marine vessel are also concerned.
