Abstract (en)

[origin: WO2020053758A1] The present invention concerns a low- voltage backup energy system (1), particularly for railway signaling, provided with a plurality of supercapacitors (C1 -C18) inserted in an electric circuit (2) and connected to each other and provided with a protection device (3) connected to the plurality of supercapacitors (C1-C18) for opening/closing the electric circuit (2).
