Abstract (en)
[origin: CN212001443U] The utility model discloses a water tank of a cabinet body. The cabinet comprises a cabinet body, a flushing water tank and a water inlet waterway, wherein the flushing water tank is installed on the cabinet body, the water inlet channel is divided into two water outlet branches, one water outlet branch is used for supplying water to the flushing water tank, the other water outlet branch is used for supplying water to a cleaning assembly, a filter element tank is arranged in the other water outlet branch, and the filter element tank is installed in the cabinet body. The filter element tank is arranged on the water outlet branch for supplying water to the cleaning assembly, the filter element tank can filter water flow, harmful substances are filtered out, and it is guaranteed that the water flow of the cleaning assembly used for hip washing and bidet washing is clean and sanitary.
