Abstract (en)

[origin: EP3851689A1] A gas turbine engine (10) has: an engine shaft (20) rotatable about a rotation axis (11); at least two bearings (24) spaced apart from one another along the rotation axis (11), the at least two bearings (24) having inner races (24a) for rotation with the engine shaft (20), outer races (24b), and rolling elements (24c) disposed radially between the inner races (24a) and the outer races (24b); a bearing support (42) extending axially along the rotation axis (11) from one of the at least two bearings (24) to the other, the bearing support (42) secured to both of the outer races (24b) of the at least two bearings (24), the bearing support (42) secured to a structural case (36) of the gas turbine engine (10) via frangible tabs (42e).
