Abstract (en)

[origin: WO2021144151A1] The invention relates to an arrangement for access security to a physical unit (40) that is arranged outside of a vault (10) of an apparatus (100) for handling value documents, comprising a security element (44, 45) fastened to a door (34) of the vault (10) and an indicator for documenting tampering with the security element (44, 45) connected to the vault door (34). The security element (44, 45) restricts access to the physical unit (40) when the vault door (34) is closed and does not restrict access when the vault door (34) is open.
