Abstract (en)
[origin: TW202110601A] The invention relates to a storage unit, in particular a workshop trolley 1 for storing tools, comprising at least one body 2 with a plurality of pull-out drawers 4, which can be locked by means of at least one locking unit 40 in such a way that, when any one of the drawers 4 is pulled out, the other drawers 4 are blocked. In order to be able to pull out a number of drawers and position these individually where possible, it is provided that the locking unit has an adjustment element which, in a first position, ensures the function of the locking system and, in a second position, is intended to release at least more than one drawer.
