Abstract (en)

[origin: WO2020057897A1] The invention relates to a rail vehicle car (4, 30, 32, 36) having a plurality of side wall modules designed as window modules (6, 8). To achieve a rail vehicle car (4, 30, 32, 36) with optimised window modules (6, 8), which rail vehicle car can more particularly be quickly and cost-effectively adapted to customer requirements, according to the invention all window modules (6, 8) each have either a first width (b1) or a smaller second width (b2), wherein at least one of the window modules (6) has the first width (b1) and at least one of the window modules (8) has the second width (b2).
