Abstract (en)

[origin: WO2020058348A1] A call input device (1) for an elevator installation (15). The call input device (1) comprises at least one call input unit (19). The call input unit (19) comprises at least one direction call button and in particular an up direction call button (5) and/or a down direction call button (6). The call input device (1) furthermore comprises a storage medium and an output region. During operation, when the direction call button (4) is actuated, a call input instruction stored in the storage medium is output in the output region (7).
