Abstract (en)

[origin: WO2020057795A1] The invention relates to a press cover comprising at least one polymer layer in which a reinforcing structure is embedded, wherein the reinforcing structure comprises at least one reinforcing thread, wherein the material of the reinforcing structure and that of the at least one polymer layer are selected such that the visible light transmittances thereof differ from each other. The invention also relates to the use of such a press cover and to a press roll and a shoe press.
