Abstract (en)
[origin: WO2020058932A1] The present invention relates to the field of devices used for laying tiles in any area, whether domestic or not. In particular, the present invention deals with an innovative positioning device for tiles useful for obtaining their correct alignment during laying, obtaining any type of spacing between them, that is to say, more or less pronounced, ie wide, in a way precise and stable, this innovative device guarantees stable positioning of the tiles themselves.
