Abstract (en)

[origin: WO2020060399A1] Method for distributing fuel, comprising transport from a fuel production apparatus to at least one filling station, for example a transport means filling station, wherein the fuel to be transported substantially consists of hydrogen, wherein the fuel is transported through a transport network (N) by means of a transport medium, wherein the hydrogen is separated at least partly from the transport medium before the fuel is supplied to the filling station. The invention furthermore provides a system for distributing fuel.
