Abstract (en)

[origin: WO2020058289A1] Luminous module (1) for a lighting and/or signalling device of a motor vehicle, said module comprising: at least one light source (14) positioned on a source holder (10); an optical element (30) comprising an entrance face that receives light rays emitted by said at least one light source (14) and that is positioned facing the latter; and a frame (20) bearing the optical element (30) and fastened to said source holder (10), characterised in that the optical element (30) comprises at least one tab (350) having a free end that protrudes towards the source holder (10), said at least one tab (350) being made from the same material as the optical element (30) and making direct or indirect contact with the source holder (10) when the luminous module (1) is assembled.
