Abstract (en)  
[origin: WO2020057881A1] The invention relates to a gunner's sight having a housing, wherein the housing has at least one opening. The housing therefore is not arranged completely around the gunner's sight. At least one sight is arranged in the housing and its line of sight leads out from the opening. Also provided is at least one protection element which is at least partially transparent. The protection element can therefore constitute protection for the gunner's sight and can, nevertheless, guarantee the continued functioning of the gunner's sight as a result of the transparency of the protection element.
