Abstract (en)

[origin: WO2020057827A1] The present invention relates to an electric motor (1) comprising a body (2) which constitutes the outer component, a rotor shaft group (3) which constitutes the rotary component, a cover (4) which provides the isolation between the inner and outer environments, a foot (5) which enables the body (2) to be seated on a floor, and a fan cover (6) which covers the fan, a terminal box (7) and a terminal group (8), wherein the electrical and mechanical connection of the terminal group (8) can be quickly and easily performed.
