Abstract (en)
[origin: EP3855066A1] The present invention is directed to a flat luminaire (1), like a flat outdoor luminaire, comprising a flat, three-dimensional luminaire body (2) being made of a metal sheet (2'), a lighting electronic (3), a light source (4) being operably connected to the lighting electronic (3), and a luminaire cover (5) having a light transmission section (50) to allow light to pass through and a receiving section (51) for at least partially receiving the lighting electronic (3), wherein the luminaire cover (5) is attached to the luminaire body (2) such that the light transmission section (50) covers the light source (4) so that light of the light source (4) can emit through the light transmission section (50). The invention is further directed to a method of manufacturing such a flat luminaire (1).
