Abstract (en)
[origin: EP3855109A1] A bullet (1) for a firearm is described, said bullet comprising a solid body extended along a longitudinal axis (X) and made of copper or an alloy thereof, or of tin or an alloy thereof, the body comprising a tapered front section (2) and a guide section (3) connected to the tapered front section (2), the guide section (3) having a plurality of circumferential projections (10) which are alternated with circumferential grooves (9), said projections (10) having a front portion (11) and a rear portion (12) which have both a curved profile and are bevelled. The curved-profile front portion (11) has a radius of curvature (R1) which is greater than the radius of curvature (R2) of the curved-profile rear portion (12).
