Abstract (en)
[origin: WO2020064618A1] The present disclosure relates to the field of smoking tobacco. In particular, the present disclosure relates to smoking substitute systems and particularly, although not exclusively, to a heat-not-burn (HNB) smoking substitute system. Further in particular, the present disclosure relates to a smoking substitute system having at least two different modes of operation. Accordingly, there is provided a smoking substitute device (10) comprising a heating element (12), wherein the smoking substitute device (10) is adapted for receiving a smoking substitute consumable (20), wherein the heating element (12) is adapted for heating the smoking substitute consumable (20), wherein the smoking substitute device (10) comprises at least two modes of operation and wherein the smoking substitute device (10) is a heat-not-burn smoking substitute device.
