Abstract (en)

[origin: WO2020065184A1] The invention relates to a container (1) for (a) cosmetic product(s), comprising at least one base part (40) that has at least one housing which is delimited for receiving a cosmetic product, a cover (10) that is hinged about a first rear pivoting axis, manually actuatable means for holding the cover (10) closed on the base part (40), and an intermediate panel (50) that can rotate with respect to the cover (10) and to the base part (40) about a second rear pivot axis, when the container (1) is open, between at least a first closed usage position in which an inner edge (51) of said intermediate panel (50) is lowered onto the base part (40) around the cosmetic product in order to keep the product within the inner housing, and a second inclined open position; characterised in that the means for holding the cover (10) closed on the base part (40) comprise two independent parts, at least one first part (91) of which is supported exclusively by the intermediate panel (50).
