Abstract (en)

[origin: WO2020201805A2] An adjustable wheelchair seat cushion apparatus including a resilient thermoplastic honeycomb seat cushion member and a pivotally attached base member forming a planar base upon which the upper cushion member will rest when folded about the pivot to engage and lay thereupon. Positioned upon the base member and disposed between it and the overlying cushion member are user or therapist positionable, prescriptively sized and shaped pelvic obliquity elements, pommels and/or wedges operative to deform the cushion member when engaged therewith.
