Abstract (en)

[origin: WO2020064330A1] The invention relates to a method for controlling or regulating a hand-held power tool, in particular a screwdriver, preferably a rotary percussion drill, comprising at least the following steps: applying screw means having a first torque, in particular a torque pulse, in a first direction of rotation, and subjecting the screw means having a second torque, in particular a torque pulse, in a second direction of rotation opposite to the first direction of rotation.
