Abstract (en)

[origin: WO2020065546A1] The invention relates to a shipping and reshipping packaging unit comprising a packaging body (C) and at least one closure panel (27, 77) and means for maintaining the closure panel (27, 77) in a closed position of the packaging body (C) by adhesion, characterized in that the maintaining means comprise at least one closure strip (B) comprising at least one separable portion (31, 33, 52) connected to the rest of the closure strip (B) and/or to the rest of the packaging unit, namely the body and/or the closure panel (27, 77), by at least one weaker line, and at least one permanent portion (32, 51, 53) that is substantially aligned with the separable portion (31, 33, 52) and remains integral with the rest of the packaging unit after separation of the separable portion (31, 33, 52), the closure strip (B) bearing, on a face, referred to as internal face, intended to be oriented towards the interior of the packaging unit when the latter is closed, at least one rectilinear adhesive strip (40) extending at least partially along the length of the closure strip (B), including over the separable portion (31, 33, 52) and permanent portion (32, 51, 53) and being covered by a protector that is peelable into a plurality of individually peelable portions (41, 42, 43) corresponding at least to the separable and permanent portions of the closure strip (B).
