Abstract (en)

[origin: GB2577332A] The tile support apparatus 100 comprises an elongate bar and mounted on respective ends of columns 20. The columns are independently height adjustable by means of respective actuators 28. The apparatus also includes a levelling device. Each column may comprise an inner rod and outer tube, the actuator moves the tube longitudinally with respect to the rod and may be a trigger type lever. Also claimed is a kit comprising the parts to make the tile support apparatus. Also claimed is a method of tiling a downwardly facing surface, such as the reveal area around a window, by applying adhesive to a surface and placing tiles on the surface and then supporting the tiles using the the support apparatus. Also claimed is a method of temporarily supporting a tile.
