Abstract (en)

[origin: WO2020069381A1] A device of a New Radio (NR) User Equipment (UE), a method and a machine readable medium to implement the method. The device includes a Radio Frequency (RF) interface, and processing circuitry coupled to the RF interface, the processing circuitry to: decode a Medium Access Control Control Element (MAC-CE) from a NR evolved NodeB (gNodeB); determine respective spatial relations for respective Physical Uplink Control Channel (PUCCH) resources simultaneously based on the MAC-CE; and encode PUCCHs for transmission to the gNodeB over the respective PUCCH resources based on the respective spatial relations.
