Abstract (en)  
[origin: WO2020069162A1] Systems, methods, and devices provide for notification and acquisition of public warning system (PWS) information by user equipment in connected mode. The PWS information may include, for example, earthquake and tsunami warning system (ETWS) and/or commercial mobile alert system (CMAS). The user equipment may include non-bandwidth reduced low complexity (non-BL) user equipment operating in coverage enhanced mode.
