Abstract (en)
A swimming goggle and a strap structure are disclosed. The swimming goggle comprises a goggle main body and the aforesaid strap structure. The goggle main body comprises a lens assembly and two lateral connectors which are disposed on two sides of the lens assembly, respectively. The strap structure comprises a strap body, an adjusting component and a positioning component. The strap body connects to the lateral connectors of the goggle main body. The adjusting component and positioning component are slidably disposed on the strap body and clamp the strap body. The adjusting component is in front of the positioning component. Therefore, the strap structure can be automatically adjusted to a suitable tightness.
