Abstract (en)

[origin: EP3858743A1] The invention concerns a filling unit (10) for filling packages (100) in a packaging machine, wherein the unit (10) comprises an assembly (12) for filling the package (100) and an assembly (13) for feeding the substance (S) to be inserted into the package (100), the filling assembly (12) and the feeding assembly (13) cooperating to insert a predefined quantity of substance (S) inside the package (100) simultaneously with the formation of said package (100), wherein said filling assembly (12) comprises one or more support members (21) able to support and prepare the shape of the sheet material (101) for the formation of the package (100). The invention also concerns a corresponding method for filling a package (100) by means of the filling unit (10) as above and a packaging machine comprising this unit (10).
