Abstract (en)

A vehicular antenna device includes a first antenna, a second antenna, a first feeding unit, a second feeding unit, and a combiner unit. The first antenna is operable in a first frequency band. The second antenna is operable in a second frequency band different from the first frequency band. The first feeding unit is connected to the first antenna. The second feeding unit is connected to the second antenna. The combiner unit combines a signal from the first feeding unit and a signal from the second feeding unit.
