Abstract (en)

The invention relates to a method (100) for communicating data, such as commissioning data, from a computing device (301) to a lighting technology device (303) with a DALI interface (305), comprising: opening (101) a web browser app on the computing device (301); accessing (103) a predefined web browser address; sending (105) data from that web browser address to an interface module (309) connected to the computing device (301), the interface module (309) being designed for translating the data onto a DALI bus (307); and sending (107) the data over the DALI bus (307) to the DALI interface (305) of the lighting technology device (303).
