Abstract (en)

[origin: WO2020069836A1] The invention relates to a securing device (10) for securing a panel (2) of a drawer (1) on a frame (4), having at least one panel support (7) arranged on the panel (2) and at least one adapter (6) which is secured in a frame (4) and to which the panel support (7) can be secured, wherein the adapter (6) has at least one catching device, by means of which a respective connection element (72) arranged on the panel support (7) can be fixed to the adapter (6) in an assembly position. The panel support (7) can be pushed onto the adapter (6) of the frame (4) in the longitudinal direction of the frame, and an interacting locking device, which is used to movably hold the panel support (7) on the adapter (6) in a linearly limited manner in the release direction (L) when the catching device(s) is/are released, is provided between a lateral wall (61, 62) of the adapter (6) and a lateral wall (71, 75) of the panel support (7), said panel support lateral wall being arranged opposite the adapter lateral wall. The invention additionally relates to a method for releasing a panel (2) from a frame (4) with such a securing device (10).
