Abstract (en)

[origin: WO2020070644A1] The invention relates to a modular shipping packaging (E), comprising at least one bottom panel (4) which forms the base of the packaging and is surrounded by a series of articulated side panels (5, 6, 7, 8), and a fill opening (O) opposite the base. According to the invention, two opposite side panels (7, 8) bear at least two inward and/or outward fold lines (24, 25, 26, 27), said fold lines crossing on the perpendicular bisector of the corresponding side panel which connects the base to the opening of the packaging. The invention also relates to a blank (F) which is precut for bend-forming a modular shipping packaging (E).
