Abstract (en)

[origin: WO2020069991A1] The invention relates to a method for producing a covering material for a covering (8) for a vehicle seat (1), the method comprising the following method steps: a) providing at least one flat starting material (20); b) making positioning openings (22) in the starting material (20); c) laying at least one ply (24a) of the at least one starting material (20) into a tool frame (40) having a plurality of positioning pins (44), the positioning pins (44) of the tool frame (40) being guided through the positioning openings (22) in the starting material (20); d) applying a material processing method to the at least one laid-in ply (24a); e) removing the at least one processed ply (24a) from the tool frame (40). The invention also relates to a covering material for a covering (8) for a vehicle seat (1) and to a vehicle seat (1).
