Abstract (en)

[origin: US10505738B1] Example embodiments of systems and methods for data transmission between transmitting and receiving devices are provided. These systems and methods may provide for the secure transmission of sensitive information, such as personally-identifiable information. In some examples, the sensitive information may be requested and securely shared when cryptographically signed by the user, and the user may control the access of viewers to the personally identifiable information or end users.
