Abstract (en)

A secure transport container 101, which has a front panel 102 and a back panel 103. The panels 102, 103 are typically made of corrugated paper. There is a closable cavity 104 formed between the front panel 102, the back panel 103. The secure transport container 101 forms a secure transport container system if combined with a sealable bag 105a and an item holder 105b. The cavity 104 is configured to hold the sealable bag 105a, which is fixed to the back panel 103. In the sealable bag 105a, the item holder 105b is fixed in place and is configured to hold first and second test tubes 105c and 105d.
