Abstract (en)
[origin: WO2020074299A1] The invention relates to a domestic appliance (1), in particular a domestic dishwasher, with a functional container (2), in particular a wash tank, an insulating arrangement (15) provided on the outside of the functional container (2), in particular wash tank, and serving for thermal and/or acoustic insulation of the functional container (2), in particular wash tank, and a fastening mechanism (29) for mechanically fastening the insulating arrangement (15) to the functional container (2), in particular wash tank, wherein the insulating arrangement (15) has an insulating element (20), and wherein the insulating element (20) is produced in one piece from a plastics material which, in a cured and/or crosslinked state, has preferably adhesive properties, such that the insulating element (20), via a surface (21) directed towards the functional container (2), in particular wash tank, adheres to the functional container (2), in particular wash tank, and is separable from the latter without destruction.
