Abstract (en)  
[origin: WO2020074846A1] Disclosed is a process (1) for manufacturing a composite body (60), in particular a vehicle suspension element, the composite body (60) having a given shape, the process involving the following steps: providing (2) an impregnated composite cord (51); placing (3), around the cord (51), a sheath (52) comprising an elastic sheathing material; shaping (4) the assembly (40) comprising the cord (51) and the sheath (52) so as to obtain the given shape; and curing (5) the shaped assembly (40) so as to harden the resin of the cord (51) and thus obtain the composite body (60).
