Abstract (en)

[origin: WO2020074589A1] Device (1) for producing a ground surface cover, comprising at least one cellular structure (10) provided with a plurality of cells (2), each of which is delimited by walls (20, 21, 22, 23) and an upper opening plane and comprises at least one base as well as communication passages from one cell to the other, each cell (2) comprising a support (26) for supporting a pavestone (3) to be placed in the cell. The support comprises a central zone (26-1), which is centrally located in the cell, and connection elements (26-2 to 26-9) which connect the central zone to the walls by means of rigid connection arms. Cavities (26') are provided under the connection elements (26-2 to 26-9) which form bridges.
