Abstract (en)

[origin: WO2020075153A1] The present invention relates to a method for electronic identification, on a network, of a first party (30) in respect of at least a second party (20) comprising the establishment of a time-stamped certified document (60) containing data relating to the first party in response to a request (40) from the second party, said request being sent over an application programming interface (11) and comprising a plurality of demands to which the first party responds at least partially by sending responses (50) via said application programming interface, the method comprising: a step of storing responses (50) in a blockchain (12); a step of creating the certified document (60) based on the request from the second party, responses from the first party and responses previously stored in the blockchain.
