Abstract (en)
[origin: WO2020074074A1] Invention relates to a generator set (14) comprising an internal combustion piston engine (10), an electric generator (12) mechanically coupled with the internal combustion piston engine (10) so as to receive power to rotate the electric generator (12) and a common base frame (16) which the internal combustion piston engine and the electric generator (12) are supported on and attached to. The base frame (16) of the generator set (14) is provided with plurality of resonator units (20, 20') comprising a bordered resonator space (22) (22), which resonator space (22) is provided with at least one communication port (24) so as to allow communication between the resonator space (22) and its surroundings.(Fig. 1)
