Abstract (en)
A transportation arrangement for transportation of an object on a surface comprises at least one transportation unit (10). The transportation unit comprises a housing (11) comprising a vertical front surface, two arms movably connected to the housing at each side of the vertical front surface, at least one rolling element (12) arranged at a lower portion of the housing, and a power source connected to the rolling elements and the movable arms. The rolling element are configured to roll in any horizontal direction on the surface.
