Abstract (en)  
[origin: US2021253308A1] A lid made of paper and a method for its manufacture, comprising a lid disk and a lid ring having a longitudinal axis and a circumferential wall extending in the direction of the longitudinal axis and having an inner surface and an outer surface as well as a first end and a second end. The outer circumference of the lid ring has a U-shaped region with a first wall section and a second wall section, which are connected to one another via a third wall section. The lid ring has a U-shaped region with a first wall section and a second wall section connected to each other via a third wall section. The lid ring engages with its first end in the U-shaped region of the lid disk such that the first wall section rests against the inner surface and the second wall section rests against the outer surface.
