Abstract (en)
Light system (1) comprising- a light track (2) comprising an aluminium profile (8) with a substantially H-shaped transversal section provided with a groove (10) on each longitudinal side perpendicular to the light-emitting side;- at least a lateral accessory element (3, 30, 31, 32) being removably fixed to said groove (10) through a fixing system (11) and comprising three elements:- a vertical element (12) perpendicular to the light-emitting side and comprising two screws or grub screws (16);- a stabilizing element (13) parallel to the light-emitting side; wherein said vertical element (12) and said stabilizing element (13) are the same for each lateral accessory element (3, 30, 31, 32); and- a variable support element (14), specific for each lateral accessory element (3, 30, 31, 32), having an L-shape, whose main dimension is about parallel to the light-emitting side of the said light track (2).
