Abstract (en)

[origin: WO2020078942A1] The present invention relates to a method for controlling Septoria tritici comprising at least one mutation in the CYP51 gene and being resistant to C14-demethylase (in sterol biosynthesis) inhibitor fungicides (DMI fungicides) on cereal plants, comprising treating the plants, their seed or the soil with a fungicidally effective amount of a compound of formula (I).
