Abstract (en)  
[origin: WO2020078659A1] The invention relates to a cosmetic foam containing a) an oil-in-water emulsion (O/W emulsion) containing aa) a wax combination of at least two waxes, the first wax having a melting point of 40-50 °C at 1.013 bar and the second wax having a melting point of over 50 °C at 1.013 bar, the wax having a melting point of 40-50 °C in a concentration of 4 to 10 wt% and the wax having a melting point of over 50 °C in a concentration of 1-8 wt%, in each case based on the total weight of the O/W emulsion, ab) up to 10 wt%, based on the total weight of the O/W emulsion, of one or more oils which are liquid at 20 °C and 1.013 bar, ac) 0.1 to 0.4 wt%, based on the total weight of the O/W emulsion on one or more emulsifiers, the O/W emulsion being free from polyethylene glycol and the ethers or esters thereof, polypropylene glycols and the ethers and esters thereof, surfactants, proteins, mineral oils and mineral waxes, silicone oils and silicone waxes, parabens, isothiazolinones and 3-iodopropargyl-N-butylcarbamate (IPBC), and b) 20-50 wt% of one or more propellant gases, and the production and filling process thereof.
