Abstract (en)
[origin: WO2020078830A1] The invention relates to a sample preparation apparatus comprising a vacuum chamber, at least one sample holding unit for holding a sample in the vacuum chamber, and at least one sublimation device arranged in the vacuum chamber at a distance from the at least one sample holding unit, wherein the sublimation device comprises a heat conducting body having at least one receiving section configured to receive a substance to be sublimated and at least one temperature conditioner for heating/cooling the receiving section of the heat conducting body to carry out a sublimation and deposition process on the sample in the vacuum chamber.
