Abstract (en)

[origin: WO2020078754A1] The invention relates to a separating-sheet feed unit for a cutting device for counting up food products, in particular a high-performance slicer, the separating-sheet feed unit comprising an outlet unit having an outlet slot, through which separating sheets are discharged in the direction of the cutting device, and wherein the separating-sheet feed unit comprises a cleaning unit for blowing the outlet slot out by means of a cleaning gas. The invention further relates to a cutting device and to a method for operating the separating-sheet feed unit and to a method for operating the cutting device.
