Abstract (en)

[origin: WO2020079535A1] A method for collecting, from a cut panel for obtaining predetermined articles, the articles and scraps generated by the cutting of the panel comprising following steps: making available a cut panel (P) in which predetermined articles (A) and scraps (S) are defined; having available an electronic processor; having available at least a cutting file in which the dimensions, positioning and orientation of the articles (A) and scraps (S) are defined; memorising the cutting file in the electronic processor; positioning the cut panel (P) on a support of a first station; removing, in accordance with the indications of the cutting file, at least one scrap (S) at a time from the cut panel (P) by separating the adjacent cut articles and/or scraps, without altering the orientation and mutual positioning of both thereof, with a subsequent transfer of the at least a scrap (S) into a scrap collecting station.
