Abstract (en)

[origin: WO2020079374A1] The invention relates to a woven textile fabric that comprises, at least in one of the warp or weft directions, unflocked threads and flocked threads, the flocked threads comprising a support thread with a core covered by an adhesive layer, said support thread having a basic diameter and protruding filaments that give said flocked threads an apparent diameter, the unflocked threads having a diameter that is smaller than said apparent diameter and greater than the basic diameter of the flocked threads.
